The Panther Companies Announce the Launch of the Panther Production Pack Series of Chemical Additives

Experience the power and efficiency of the Panther Production Pack series chemicals – your key to unlocking unmatched production capabilities.

HOUSTON, TX - (June 20, 2023): The Panther Companies (“Panther”), a distinguished provider of comprehensive services encompassing drilling fluids, solids control, and rentals, is proud to unveil the Panther Production Pack series. This innovative range of top-tier chemical additives includes clay and iron control, scale inhibitors, non-emulsifiers, and lubricants, all designed to aggressively enhance production efficiency in oilfield operations.

“We are excited to introduce the Panther Production Pack series to the oil and gas industry,” said Garrow Wessendorff, president and CEO of Panther. “Our commitment to developing high-performance, sustainable products is evident in this series. We believe these additives will significantly improve operational efficiencies while supporting our customers’ sustainability goals.”

The Panther Production Pack series is engineered to deliver robust, fast-acting results, boosting completion and production levels to unprecedented heights. These effective additives allow oilfield operators to confidently meet their drilling objectives. At the same time, the series distinguishes itself with a strong focus on sustainability. Many products within the series feature groundbreaking bio-based surfactant technology and have a Renewable Carbon Index (RCI) ranging from 10% to 50%, underscoring Panther’s unwavering commitment to eco-friendly solutions.

Key features and benefits of the Panther Production Pack series include:

- **Clay Control:** Effectively treats exposed swelling clays, reducing fines migration and prolonging the integrity of the fracture network.

- **Iron Control:** High-performance iron-control additives compatible across a broad range of pH levels and with all completion fluid additives.
- **Scale Inhibitors:** Advanced polymer chemistry ensures optimal performance, even in extreme conditions.
- **Non-Emulsifier:** Efficiently breaks emulsions in various crude oils, backed by innovative, sustainable bio-based surfactants and an RCI range of 16.5% to 49%.
- **Surfactants:** Eco-friendly micro-emulsion flow aids boost hydrocarbon recovery, offering a 10%-50% higher RCI.
- **Paraffin & Asphaltene Control:** Dissolves long-chain alkanes, maintains crude oil compatibility, and prevents future build-up in the wellbore.
- **Lubricants:** Biopolymer-based lubricants provide exceptional performance in demanding environments, reducing friction and wear on equipment.

About The Panther Companies

Established in 2017 by a seasoned team of oilfield services professionals, Panther Fluids Management set out with a clear mission: to provide top-quality products and solutions, while protecting the bottom line of our customers. Initially, our offerings consisted of drilling and completion fluids, production chemicals, solids control services, closed-loop equipment, haul-off and disposal services, and on-site fluid engineering.

In 2021, we broadened our horizons and evolved into The Panther Companies, expanding our services to include an extensive range of rental offerings. Today, we serve the entire energy industry with a comprehensive portfolio of products and services. Our goal remains the same: to help our customers achieve efficient operations, enhance jobsite safety, ensure regulatory compliance, and alleviate administrative burdens. We are The Panther Companies, your trusted partner in the energy sector.
